Alternative Dispute Resolution in Tanzania - Law and Practice

Today, Alternative Dispute Resolution (ADR) has gained international recognition and is widely used to complement the conventional methods of resolving disputes through courts of law. ADR simply entails all modes of dispute settlement/resolution other than the traditional approaches of dispute settlement through courts of law. Mainly, these modes are: negotiation, mediation, [re]conciliation, and arbitration. The modern ADR movement began in the United States as a result of two main concerns for reforming the American justice system: the need for better-quality processes and outcomes in the judicial system; and the need for efficiency of justice. ADR was transplanted into the African legal systems in the 1980s and 1990s as a result of the liberalization of the African economies, which was accompanied by such conditionalities as reform of the justice and legal sectors, under the Structural Adjustment Programmes. However, most of the methods of ADR that are promoted for inclusion in African justice systems are similar to pre-colonial African dispute settlement mechanisms that encouraged restoration of harmony and social bonds in the justice system. In Tanzania ADR was introduced in 1994 through Government Notice No. 422, which amended the First Schedule to the Civil Procedure Code Act (1966), and it is now an inherent component of the country's legal system. In recognition of its importance in civil litigation in Tanzania, ADR has been made a compulsory subject in higher learning/training institutions for lawyers. This handbook provides theories, principles, examples of practice, and materials relating to ADR in Tanzania and is therefore an essential resource for practicing lawyers as well as law students with an interest in Tanzania. It also contains additional information on evolving standards in international commercial arbitration, which are very useful to legal practitioners and law students.

Alternative Dispute Resolution - A Conflict Diagnosis Approach

Now in paperback, this book addresses the rapidly evolving field of Alternative Dispute Resolution in a manner ahead of its time. Taking a cross-disciplinary approach, it explains the cognitive, social, organizational and developmental psychology theories that influence ADR and its approaches. From mediation to arbitration to hybrid processes, it helps students understand the strengths and weaknesses of the many varieties of ADR, and why various approaches succeed or fail. This edition includes streamlined coverage of conflict diagnosis, increased
treatment of non-adversarial, facilitative forms of dispute resolution, and the latest legal and ethical trends impacting the field. For human resources personnel, dispute resolution system designers, trainers and ombuds, as well as ADR neutrals and neutrals-in-training

**A Handbook of Dispute Resolution - ADR in Action**

A Handbook of Dispute Resolution examines the theoretical and practical developments that are transforming the practice of lawyers and other professionals engaged in settling disputes, grievance-handling and litigation. The book explains what distinguishes ADR from other forms of dispute resolution and examines the role ADR can play in a range of contexts where litigation would once have been the only option, such as family law and company law. In some areas, like industrial relations, ADR is not an alternative, but the main method of conflict-intervention, and several contributors draw on their experience of negotiating between management and unions. A wide variety of methods is open to the non-litigious, including resort to Ombudsmen, negotiation, small claims courts and mini-trials; these and other options receive detailed attention. Given the newness of ADR as a discipline, questions about the training of mediators and about the role of central government have not yet been resolved. The final section of the book is devoted to discussion of these issues. Case studies are drawn from the international arena - examples from China, Canada, Australia, Germany and North America place ADR in a cultural and historical perspective.

Numerous cross-references to relevant websites and further resources are also provided. This fourth edition has been brought fully up to date to reflect current practice and issues affecting ADR. The book's expanded coverage also makes it a suitable text for LLM courses on ADR. Online Resource Centre - Updates to cases and
The Handbook of Dispute Resolution

This volume is an essential, cutting-edge reference for all practitioners, students, and teachers in the field of dispute resolution. Each chapter was written specifically for this collection and has never before been published. The contributors--drawn from a wide range of academic disciplines--contains many of the most prominent names in dispute resolution today, including Frank E. A. Sander, Carrie Menkel-Meadow, Bruce Patton, Lawrence Susskind, Ethan Katsh, Deborah Kolb, and Max Bazerman. The Handbook of Dispute Resolution contains the most current thinking about dispute resolution. It synthesizes more than thirty years of research into cogent, practitioner-focused chapters that assume no previous background in the field. At the same time, the book offers path-breaking research and theory that will interest those who have been immersed in the study or practice of dispute resolution for years. The Handbook also offers insights on how to understand disputants. It explores how personality factors, emotions, concerns about identity, relationship dynamics, and perceptions contribute to the escalation of disputes. The volume also explains some of the lessons available from viewing disputes through the lens of gender and cultural differences.
